Habia | HEW KABEL Habia Cable

Medical

Cabling solutions for medical technology

Everything from one source

HEW-KABEL develops and manufactures specialised cables for medical devices and instruments for various applications, primarily in the fields of diagnostics, surgery, and patient monitoring.

To provide a space- and cost-efficient solution for each task, we produce application-specific medical cables as hybrid cables, as well as miniature cables or flat cables for particularly compact devices.

Hybrid Cable

+ Combination of different elements in one cable, for example fibre optic cables, coax elements, single cores, strain relief and PTFE tubes
+ Simultaneous transmission of energy, high-speed data microwave signals RF, gases, liquids or light

Flat Cable

+ Ultra-flexible solutions with low dead weight and extremely small bending radius
+ Simultaneous transmission of energy, data, signals, gases, liquids or light
+ No cable track required as a guide, minimised running noise, smooth and jerk-free movement

Miniature Cable

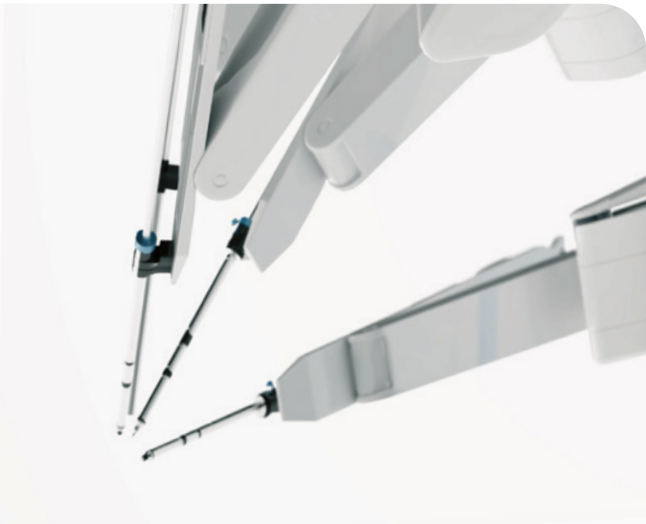

+ Cross Section up to AWG42 (ø ≈ 0.0633 mm)/ FEP-ETFE
+ Cross Section up to AWG40 (ø ≈ 0.0799 mm)/ PFA
+ As single cable or multicoaxial cable
+ Absolutely reliable and interference-free transmission of various data in real time
+ Simultaneous transmission of data, light, liquids and electricity

Full Systems

+ Ready-to-connect solutions
+ Termination according to customer specifications
+ Hybrid solutions
+ Miniature solutions

From development to the ready-to-install, highly specialised cable or cable system, our customers receive everything from one source. We are an one stop shop.

For every application the optimal solution

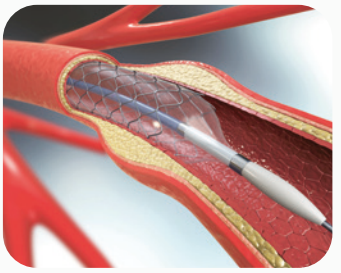

Imaging Diagnostics

+ High-speed transmission of data, signals and energy
+ Excellent image quality
+ Minimal susceptibility to interference (EMC)
+ Space-saving constructions

Hygiene

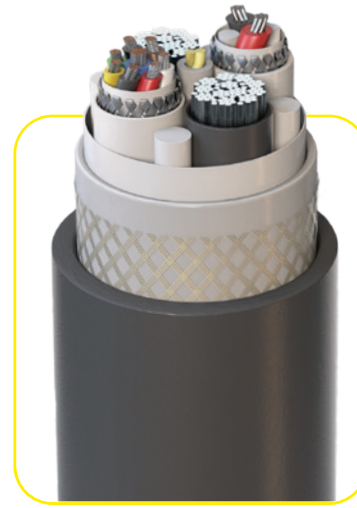

+ Non-adhesive surface (HEW Silindo®)
+ Wipe-disinfectable
+ Autoclavable

Handling

+ Ultra-flexible solutions
+ Low tare weight
+ Ergonomic handling
+ Safe and comfortable complete solution

HEW-Silindo®

Biocompatible silicone cable without stick-slip effect

The Silindo® surface developed by HEW-KABEL permanently improves the conventional silicone feel. "Sticking" is permanently prevented. This surface property is retained even after multiple autoclave cycles. HEW-Silindo® does not require any foreign material in the silicone or on the surface.

Features

of HEW-Silindo®

+ Completely new touch: no foreign material in the silicone or on the surface
+ Permanent improvement of surface haptics: no stick-slip effect ("sticking")
+ Minimised sliding friction: even after multiple auto clave cycles

Sterilisation Options

of HEW-Silindo®

+ Steam sterilisation (autoclave)
+ Disinfection washing machine
+ Gas sterilisation (Ethylenoxid)
+ Gamma sterilisation
+ Wipe disinfection
