REACH

Under the definition of the REACH regulations EC1907/2006, Habia Cable is a producer of “articles” and is therefore only obliged to register substances within its products in the event that they exceed the specified limits, and in the few cases where Habia Cable imports substances from suppliers outside EU.

The European Chemicals Agency (ECHA) maintains a “Candidate List” of “Substances of Very High Concern” (“SVHC”). Habia Cable’s aim is that articles put on the market shall not contain any SVHC in excess of 0.1% by weight.

Habia Cable continuously monitors additions to the “Candidate List” and the impact on the products Habia Cable supplies. If any substance present in excess of 0.1% by weight in any Habia Cable article is included on the “Candidate list”, this is communicated to concerned customers, as required by REACH, and replacement of the material containing the substance will be considered.

The official “Candidate List” of SVHCs may be accessed [here](#). For more information about REACH please visit the [official ECHA website](#). For any further questions with regard to product REACH compliance, please get in contact with your local sales representative.
